DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 23 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 23 recites the limitation "said means for providing a reactant gas" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Response to Amendment

4. The objection to the drawings presented in the office action mailed January 12, 2005 is withdrawn in light of the amendment.
5. The objection to the specification presented in the office action mailed January 12, 2005 is withdrawn in light of the amendment.
6. The claim objections presented in the office action mailed January 12, 2005 are withdrawn in light of the amendment.
7. The 103(a) rejection of claims 1-24 over Scobey in view of Belkind presented in the office action mailed January 12, 2005 is withdrawn in light of Applicant's arguments.

Allowable Subject Matter

8. Claim, 1-9, 11, and 13-21 are allowed.
9. The following is a statement of reasons for the indication of allowable subject matter: it is neither anticipated nor obvious over the prior art of record to have a reactive magnetron sputter

Art Unit: 1753

deposition process as claimed by Applicant in claim 13 or a reactive magnetron sputter deposition apparatus as claimed by Applicant in claim 1.

10. Scobey, as discussed by Applicant, does not have a reactant gas providing means "at" the target source and also does not direct the reactant gas to the target source. Modifying Scobey would involve tearing apart the reference to change the gas delivery method. It is particularly notable that Scobey introduces the inter gas at the target and the reactive gas away from the target. Thus, there is significance, a teaching away if you will, of providing the reactive gas away from the target in Scobey. Providing the reactive gas at the target, even if motivation existed, would not be obvious because Scobey teaching away from such a limitation.
